	antennas were mounted in groups of two on each gun carrier and were rotatable.	
IST OF MACHI	NES IN THE PLANT	50V1 LIIM

the following equipment in shop:

50X1-HUM 50X1-HUM

24 Horizontal lathes.

4 Automatic lathes. These were not in operation at the time of my employment.

- 1 Semi-automatic lathe.
  - 6 Vertical milling machines.
- l Jig drill of small type.

Various tool grinding machines.

in another plant some small type precision lathes and at least three large jig drills 50X1-HUM were available.

## POTENTIAL OF THE PLANT AND POSSIBLE FUTURE UTILIZATION

5. Machines on hand there limited plant production to the machining of small parts. Serial production was not possible due to the absence of automatic type equipment,
